ABOUT ME

Computer Science and Engineering student at Instituto Superior Técnico, passionate about applying technology to solve real-world problems and build reliable software. Through academic and personal projects, I have gained experience with Python, C, Java, C++, and Assembly while continuously developing my technical and problem-solving skills.

EDUCATION

Instituto Superior Técnico
2024 - Present
Bsc in Computer Science and Engineering
Escola Secundária Miguel Torga
2021-2024
Grade: 18/20 Science and Technology

LANGUAGES

- > Portuguese-Native
- > English-B2
- > Romanian-Native

SKILLS

- > Python
- > SQL
- > Java
- > C
- > C++
- > Assembly
- > JavaScript
- > Tailwind CSS
- > Next.js
- > HTML

AWARDS

- > 4x Academic Excellence Award 23/24
22/23 20/21 18/19
- > Geology Olympiad Merit Award(2nd place)
- > Academic Merit Award 21/22

PROJECTS

- > **Personal portfolio website:** Showcasing my work in my field.
- > **AI-Based SlitherLink Solver:** Built an AI-driven solver using Python to efficiently complete SlitherLink puzzle levels.
- > **System Modeling & UML Diagrams:** Designed UML diagrams and system models to improve software architecture and design clarity.
- > **Zoo Database Management System:** Designed and implemented a relational database to store and manage zoo data. Used SQL and PostgreSQL to write complex queries for efficient data retrieval, updates, and database management.
- > **Championship Outcome Optimizer:** Built an optimization model in Python using PuLP to analyze sports league scenarios and compute the minimum wins required for each team to still win the championship.
- > **Pacman Multiplayer Server:** Built a Linux-based multiplayer game server in C, leveraging POSIX threads, inter-process communication, file descriptors, signals, and ncurses to manage multiple concurrent client sessions
- > **Delivery Route Assignment Optimizer:** Developed an efficient graph-based algorithm in C++ to compute path counts in directed acyclic graphs (DAGs) using dynamic programming, enabling optimized delivery route assignment based on path analysis.
